OSHA 30

Education

B.S.B.A. in Information Systems and Technology
Concentration: Network Engineering
Old Dominion University
January 2021-August 2023

A.S. in Information Technology
Northern Virginia Community College
January 2019-August 2022

Volunteer

YWCA, Norfolk, VA
April 2023-Present

Virginia Peninsula Foodbank, Hampton, VA
September 2021-Present

Professional Summary

Well rounded former Marine and college graduate with experience in information systems and technology, network operations, and cybersecurity services. I aim to strive towards perfection while continuously learning more to better understand and help people and businesses achieve their goals.

Experience

As a SharePoint site owner I created, edited, troubleshot, and maintained portals for 200 civilian employees' training through Learning Management Systems (LMS).

Responded to work tickets such as browser and connectivity issues, printer access and proximity badge troubles, by helping customers through troubleshooting and problem-solving steps to reach a solution.

Designed a campus area network for over 400 classrooms using a hybrid topology in Microsoft Visio and sought vendor products to decrease costs and increase networking efficiency. (*school project*)

Prepared for, detected, and contained cybersecurity incidents and crafted reports for ISSM review. Tracked and documented, through verbal and written communications, vulnerabilities (CVEs), mitigations, and resolutions at a large enterprise which designed and manufactured products for the Navy.

Troubleshoot, configured, and replaced IoT devices and MFD printers in more than 70 campus buildings.

Applied account management procedures for more than 23,000 students and staff, ensuring adherence to security procedures and compliance with relevant regulations.

Performed system administration in Windows Server 2019 and created local and virtual instances of Active Directory domains consisting of 5 or more groups along with their respective policies and user roles, as well as access control lists (ACL). (*school project*)

Effectively collaborated with customers and team members for cell tower lighting projects, sourcing, installing, and upgrading LAN/WAN and communication hardware (routers, yagi/omni antennas, electrical wiring, power, grounding, network cabling) at heights up to 500 feet.

Served as a Phase Inspection Program Manager supervising more than 12 military personnel/employees with firm and courteous leadership to reduce the completion time of scheduled inspections of 30 T/AV-8B aircraft by 50%.

Employment History

Global Technical Systems, Cybersecurity Analyst (2 month internship)
August 2023-October 2023, Virginia Beach, VA

ODU Information Technology Services, Telecom Technician / Help Desk
July 2022-September 2022, Norfolk, VA
