CERTIFICATIONS

TS/SCI clearance, CompTIA Security+ / Network+ / A+, Lean Six Sigma Yellow Belt, OSHA 10, OSHA 30

WORK EXPERIENCE

Norfolk SPCA, Norfolk, VA

Animal Care & Adoption Specialist

July 2024-Present

- Provide customer service and assist the public in viewing and meeting 24 or more pets and processing adoptions.
- Keep and maintain accurate and detailed records of medical, personality, and adoption history.
- Provide excellent care including cleaning, feeding, watering, and medicating animals as directed.
- Provide a variety of daily enrichment, exercise, socialization, and teach basic commands.
- Clean, organize, and maintain all areas of the shelter.

Q.E.D. Systems, Inc., Virginia Beach, VA

End User Support IT Technician

February 2024-April 2024

- Assisted in data migration for over 500 employees from on-premise to cloud based services with Microsoft Azure / Entra ID.
- Diagnosed, repaired, and maintained 200 end user machines, hardware, and software components.
- Installed and configured computer hardware and provided IT support for the organization / enterprise.
- Routinely interacted with various departments and levels and listened to their technical needs and implemented IT solutions to resolve issues.
- Performed troubleshooting on systems, assisted in database programming, software installation, and routine updates and upgrades.
- Traveled to multiple client sites to complete daily work.

Global Technical Systems, Virginia Beach, VA

Cyber Security Analyst (Paid Internship, I rescinded offer)

August 2023-October 2023

- Served as a site owner in SharePoint, creating and editing sites and portals using Power Automate workflows that were utilized to more efficiently train 200 staff members.
- Participated in an annual audit, maintaining an accurate parts and equipment inventory record for the company, leading to seamless logistical support for new product and service developments and deployments.

- Participated in on-going training and researching new developments in cybersecurity and the information technology field at large.
- Communicated technical concepts in a more understandable way to staff with non-technical backgrounds.
- Prepared for cyber incidents by tuning monitoring tools to increase incident detection rates and lower false positive rates.
- Detected incidents by conducting routine monitoring utilizing available monitoring tools (SolarWinds SIEM / SEM, Trellix ePO), audit logs, and internet research including the evaluation of software application install requests and updates.
- Contained incidents by assisting in the identification of hosts and systems affected by the incident.
- Investigated the incident by assisting the Incident Response Team in forensic evidence collection and documented the results.
- Developed draft incident reports including pivot charts in Microsoft Excel showing relevant data and written reports for ISSM review.
- Communicated technical concepts in a more understandable way to staff with non-technical backgrounds
- Performed routine network vulnerability assessments of the HQ Network via tenable.sc.
- Tracked and documented vulnerabilities, mitigations, and resolutions.
- Configured and updated the vulnerability assessment tools as required to meet business needs.

ODU Information Technology Services, Norfolk, VA

Telecom Technician (Student Worker)

July 2022-September 2022

- Implemented processes for troubleshooting hardware and software issues, leading to a reduction in response times and enhancing overall efficiency in resolving technical problems.
- Applied account management procedures for 23,000 students and staff, ensuring adherence to security standards and compliance with relevant regulations which led to a more secure technological and physical environment and improved tracking of user access to physical locations and user access on computers and devices. (i.e. access control, printer permissions, etc.)
- Documented all work performed and entered new requests for new services on a service help desk ticketing application.
- Replaced, repaired, troubleshot, and upgraded hardware as necessary such as IP cameras, multi-function device (MFD) printers, proximity card / badge readers, wireless access points (WAPs), electronic and manual door locks, and other IoT devices.
- Supported access control for more than 70 campus buildings.
- Updated daily progress reports showing work completed and projects still in-work.

JAG Resources, Inc., Nashville, TN

Cell Tower Technician/Crew Lead

April 2021-August 2021

- Investigated, anticipated, and identified network and electrical issues; implemented solutions such as verifying proper connections and operation of cell tower lighting systems, controls, and alarms often at heights in excess of 300 feet.
- Maintained communication with supervisors, co-workers, the network operations center (NOC), and clients / customers in assessing the nature and scope of cell tower projects including a detailed plan and cost estimates for necessary parts and equipment to decrease expenses and optimize work processes.
- Utilized network software to connect to routers in the field in order to solve unusual problems and to ensure minimal disruption of services.

- Successfully maintained the parts, equipment, and technology inventory system for my crew and the company.
- On average, brought company revenues of \$2000-\$3000 a day, whilst working 10 or more hours in the field.
- Installed and maintained network infrastructure builds on site including but not limited to routers, LAN/WAN hardware, yagi and omni antennas, electrical wiring and power cables, transformers, and breakers to satisfy or exceed the business's and client's needs and expectations.
- Documented onsite work with daily progress reports in excel, including pictures of completed projects and those still in progress.
- Experience in installing and maneuvering antennas for best signal propagation while performing passive and active site surveys.
- Trained in the fundamentals of RF / EME awareness, hazard assessment for telecom sites, and lightning grounding CADWELD with Safety LMS.
- Configured routers in the field with their native graphical user interface (GUI) and used PuTTY for terminal emulation for legacy hardware configurations.
- Demonstrated strong troubleshooting skills by resolving complex wireless network issues promptly, minimizing downtime and ensuring uninterrupted network services leading to client satisfaction.

Vacasa, LLC, Perdido Key, FL

Maintenance Technician

August 2020

- Performed residential maintenance for customers in condominiums and townhomes.

NVE, Inc., Fort Lauderdale, FL

Maintenance Technician

May 2020

- Performed commercial maintenance at a State Department building.

Mister Kleen Maintenance Company, Herndon, VA

Maintenance Technician

July 2019-January 2020

- Managed and controlled maintenance requests via an automated help desk tracking and ticketing system.
- Assisted electrical engineer with installing and maintaining ethernet cables and connections for database servers.
- Monitored and managed 2 separate buildings' HVAC systems via a local software application.
- Followed safety procedures and demonstrated the ability to follow established mechanical/electrical system(s) operating sequences.
- Performed other projects as required, e.g., snow removal, cleaning up after contractors performed work, clearing leaves in drain, lawn maintenance.
- Assisted the Engineering team in the efficient operation, maintenance, and repair of building systems such as HVAC, lighting (ballasts, wiring, bulbs), fire pump (sprinkler system).
- Performed a variety of building maintenance and repair tasks, including projects that required HVAC knowledge, electrical and lighting work, plumbing, and carpentry.
- Completed work orders in a timely manner utilizing both paper work orders and computer-generated work orders either from routine building checks or customer requests.
- As a facilities maintenance technician, I regularly had direct communication with many high-profile government employees whom I maintained a customer-service relationship with while completing any necessary tasks they needed done.

Securitas/SCIS, Manassas, VA

Screening Supervisor

January 2019-June 2019

- Prevented unauthorized entry and removal of data-bearing devices within 2 restricted and secured Microsoft datacenters as a screening supervisor.
- Took note of any incidents on site via Shift Activity Reports.
- Maintained a professional yet approachable posture, while serving as a screening supervisor, and assisted clients and customers in the security process as well as answering any questions they might have regarding the area and tasks at hand.

U.S. Marine Corps

Sergeant/Phase Inspection Program Manager/Airframe Mechanic

June 2012-December 2018

- Performed daily, monthly, and intermediate scheduled and unscheduled inspections for a fleet of 30 T/AV-8B aircraft.
- Developed and maintained embassy (Ulaanbaatar, Mongolia) security policies and procedures.
- As the first face to be seen upon entering the U.S. Embassy in Mongolia, I personally greeted and assisted over 100 embassy personnel, with tasks such as directing them to a location, answering and transferring calls to the correct department, and providing any other relevant information as needed, on a daily basis.
- Ensured subordinate security officers upheld the highest standards of customer service, professionalism, and security posture at all times.
- Coordinated with base personnel, and with 132 personnel under my supervision, cleared an airfield to facilitate the return of Marine Aircraft Group 14 after a major hurricane.
- Served as a Phase Inspection Program Manager supervising more than 12 personnel/employees in a firm and courteous manner to reduce the completion time of scheduled inspections by 50%.
- Troubleshoot, repaired, and replaced vital flight controls, hydraulic, and pneumatic components leading to the safety and well-being of both flight and ground maintenance crew.
- As an armed Marine Security Guard, stood watch and provided security for over 100 U.S. Embassy employees, dignitaries, and top-secret equipment and documents.
- Escorted non-cleared guests as needed.
- Maintained necessary licensing and training in line with requirements of the client.
- Created and maintained daily pass down reports of maintenance performed.
- During semi-annual inspection, received positive remarks and no violations pertaining to the proficient maintenance, integrity, and safety of the detachments armored and soft vehicles.
- Upkept and developed ideas, such as fundraisers, to increase recreational revenue from \$300 a month up to \$500 a month.
- Earned 10 Letter of Appreciation for volunteering throughout the community and bettering relations throughout.

ADDITIONAL EXPERIENCE

YWCA, Norfolk, VA; Volunteer

April 2023-Present

Virginia Peninsula Foodbank, Hampton, VA; Volunteer

September 2021-Present
